

Mobile Devices for Property Management Software

Resort Data Processing is pleased to announce our Mobile Devices capability, designed to improve communication with guests and employees.

The five new modules below allow RDP customers to communicate with their guests and employees via a wide variety of handheld devices, including mobile phones, smart phones (iPhone, BlackBerry, Droid, etc.) and tablets (iPad, HP Slate, etc). The modules within RDP that utilize mobile devices are:

Mobile Texting Guest Communications

Mobile Texting module allows communication with guests via text messages to their mobile phones

- **Check-in Room Status** - Automatically send a text to the guest when the room status is changed to "clean and ready"
- **Text Reservation Confirmations** - The RDP system can send a text confirmation to the guest
- **Guest Messages** - Any custom message can be sent to the guest's mobile phone directly from your RDP system

Work Orders and Maintenance

Mobile Work Orders module allows communication with the maintenance department via a smart phone or tablet. A wireless internet connection is required. Capabilities include:

- Create new work order
- Notify maintenance of a work order
- Enter time spent on a work order wirelessly from the job site
- Enter notes and comments on the work completed
- Change work order status from open to closed

Mobile Check-in

- Mobile Check-in extends the power of RDP's Front Desk System to allow guest check-in from a mobile device
- Example: Have one or more employees using an iPad to walk down the check-in line & expedite check-in

Management with Mobile Devices

- Mobile Management allows for better management of the property from remote locations using a smart phone, tablet, or any wireless-ready device
- View the current occupancy status and available rooms from your phone

Housekeeping & Changing Room Status

- Mobile Housekeeping module extends the power of RDP's Housekeeping System to allow communication with the housekeeping department via a smart phone, tablet, or any mobile device
- Change/display room status and room boards
